

PsySanté proudly presents:

Manifesting your life with Ease and Grace – The Power of our Intention to Create

Workshop based on the teachings of Abraham (Jerry and Esther Hicks)

Date: **New dates upcoming** from 1:30 p.m. to 4:30 p.m.

Cost: 40\$

Facilitators: Larry Crevier and Nancy Fuoco

**Are you putting a lot of effort to achieve a new level in your life
but seem to never get what you want?**

Many of us are familiar with GPS devices that assist us in choosing a destination and then following the directives of the Satellite coordinates to get us swiftly and efficiently to where we want to go. Abraham suggests that the majority of people have not fully understood the power and benefit of deliberately focusing energy and adding their true intention ahead of them to consciously create what they want.

Many people, when asked, do not really know why they do what they do. Connecting to self, and to our true heart's desire, and clearly setting our intention in what we are manifesting is the fuel upon which we create. Without doing so, you are creating in majority from your unconscious mind which is filled with your fears and negative expectations, which many a time is what you end up creating. Abraham suggests that you consciously and deliberately take back the steering wheel to your life and create what you do want rather than what your unconscious mind negatively expects. Often this is a self fulfilling prophecy. In this three hour workshop, we will present three of Abraham's best known processes that can help you become aware of what you want and consciously focus to create exactly that. They are: The Universal Manager, The Placemat process and Segment Intending. This workshop includes the viewing of Abraham's talks through DVD, presentation of the material and group discussion.

The key is to get '**Tuned in, tapped in and turned on**' at the beginning of each day, and from that place of power to tune into our intention and formulate our day's activities. You will leave this Seminar with many new tools to apply and have fun with to incorporate in your Daily Lives'. It is our experience that these wonderful processes reap immediate and tangible results, which can encourage you to claim your own power back.

This seminar to be given at:

D.D.O. West Island home location
